Skill, Project Assignment, & Other Experience

- JUSTIPIN** (2023): I developed a personal shopper app focused on secure and easy transactions. My contributions included designing the database and creating multiple user interface pages tailored to real user needs, enhancing the overall user experience.
- Online Exam Application** (2025): I developed the scheduling module for a university's online exam management system, handling both backend and frontend development using Laravel, Inertia.js, and React. Through this project, I gained valuable full-stack experience and strengthened my skills in creating efficient scheduling solutions with role-based access
- Notionary Blog** (2025): Developed a role-based blogging CMS with Laravel and React. Handled database design, RBAC setup (admin, editor, viewer), and integrated rich text editing with image upload. Strengthened full-stack and SPA development skills.
- Soft Skills:** Teamwork, communication, problem-solving, creativity, and adaptability.
- Hard Skills:** HTML, CSS, JavaScript (ES6), PHP & Laravel, React.js, MySQL, Oracle, Git & GitHub.
- Certification:** Database Programming with SQL and Database Design
- Volunteer Experience:** HECTION by PECC and Scholarship and Study Extension Workshop 2024
